

A DIGITAL TOOLBOX IN YOUR HAND

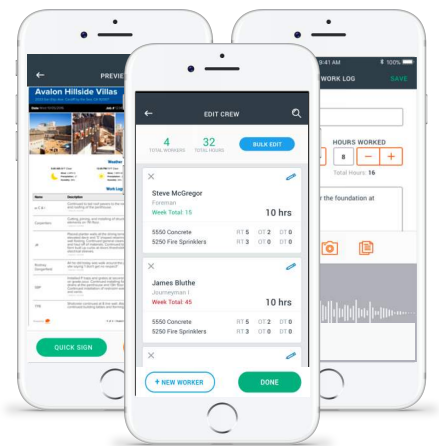

DASHBOARD AND INSIGHTS

With Raken's mobile app you can keep track the important events on your projects and see visualizations of the data your daily reports are producing.

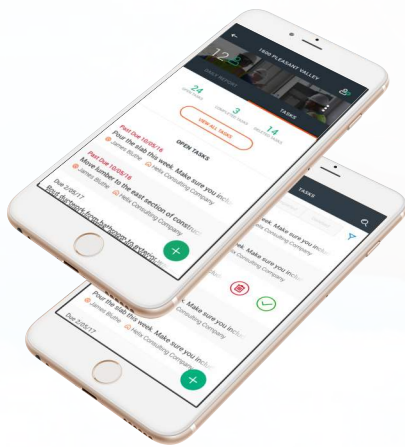

MOBILE DAILY

Raken's mobile app lets you complete a daily report right from your phone. Add work logs, track time and cost codes, and add notes to your report with voice-to-text.

TASK MANAGEMENT

With a mobile app you can track and manage tasks on site directly from your phone. If you see a task completed as you walk the site, mark it off in the app right then and there.

CAPTURE PHOTOS

Raken was designed for Superintendents to use on the go: that's why you can capture and manage high-quality photos right from the app and add them to your report right from your phone.
